1.2 Producers

Table 1.2-1 Producers of dimethyl phosphite in China, Jan. 2011–June 2012

No.	Producer	Abbr.	Location	Situation	Capacity (t/a)		Output (t)
				2012	2012	2011	2011
1	xxx	xxx	Zhejiang	Active	xxx	xxx	xxx
2	xxx	xxx	Sichuan	Active	xxx	xxx	xxx
.....
21	xxx	xxx	Jiangsu	Idle	xxx	xxx	xxx
Total				/	xxx	xxx	xxx

Figure 1.2-1 Output proportion of dimethyl phosphite producers, 2004–2011

Source: CCM International

The top six producers of dimethyl phosphite in terms of output in 2011 are xxx, xxx, xxx, xxx, xxx and xxx.

From 2004 to 2011, they have gradually achieved a dominant position of the production of dimethyl phosphite in China. Their total output of dimethyl phosphite only accounted for about xxx% of the total output in China in 2004. However, it accounts for about xxx% of the total output in China in 2011. In China, their dominant position is based on their dominant position of glyphosate technical production by glycine pathway. According to CCM International's investigation, in 2011, the total output of glyphosate technical by glycine pathway of these six producers accounts for about xxx% of the total output of glyphosate technical by glycine pathway in China.

Besides, mainly because of the six producers' dominant position of glyphosate technical production by glycine pathway, seven producers and two producers have suspended the production of dimethyl phosphite in 2011 and the first half of 2012 respectively.
