II-2 Summary of feed grade methionine production

At present, there's no feed grade methionine producer in China, and only Nanjing BlueStar, Unis Chemical, Dalian Sumitomo are carrying out their production plans.

.....

II-3.1 Introduction of BlueStar's feed grade methionine project

Table II-3.1.1.1 Major information of BlueStar's feed grade methionine site, May. 2010

Item	Content
Product	Rhodimet AT88
Capacity, '000 t/a	■
Investment , million USD	■
Technology source	Adisseo
Startup date	2009
Launch date	2012
Project area, hectare	■
Location	Changlu Zone, NCIP, Nanjing City, Jiangsu Province
Progress	civil engineering in progress

III Raw material situation in 2009

According to the feed grade methionine production technology mentioned above, the major raw materials for methionine production are methanethiol, acrolein, hydrogen cyanide, and sulfuric acid. The production situation of these raw materials will be discussed in detail in the following content.
