## 1. Introduction

This report is about new registrations of pesticide technical in China in 2019. This report not only shows an overview of the new registrations of pesticide technical in China in 2019, but also introduces the new registrations of herbicide technical, insecticide technical and fungicide technical in detail. In addition, this report presents those first registrations of new active ingredient for pesticide technical in China during the year.

So this report can reflect the development status of the pesticide industry in China and guide investment and business movements for the upstream players who pay close attention to the industry or try to find opportunities from it.

What's about the number of new registrations of pesticide technical by different pesticide category? How about the number of new registrations by different toxic level? How many pesticide active ingredients were included in the new registrations of pesticide technical? Which enterprise had the most new registrations? And how about the foreign enterprises registered in China? In this report, you will find the answers to the questions above, and to some more.

## 2. Approach for this report

The report is drafted by diverse methods as follows:

### - Desk research

The sources of desk research are various, including published magazines, journals, government websites and statistics, industrial statistics, association seminars as well as information from the Internet. A lot of work has gone into the compilation and analysis of the obtained information.

### - Internet

CCM visited government websites and contacted with players in the domestic agrochemical industry through B2B websites and software.

### - Data processing and presentation

The data collected and compiled are sourced from:

- CCM's database
- Published articles in periodicals, magazines, journals and third-party databases
- Statistics from governments and international institutes
- Telephone interviews with domestic producers, joint ventures, service suppliers and governments
- Third-party data providers
- Comments from industrial experts
- Professional databases from other sources
- Information from the internet

The data from various sources have been combined and cross-checked to make this report as precise and scientific as possible. Throughout the process, a series of internal discussions were held in order to analyse the data and draw the conclusions.

### 3. Executive summary

According to data released by the ICAMA on 31 Dec., 2019, there were altogether XXX new registrations of pesticide technical (renewals excluded) in China in 2019.

Besides, all of these new registrations were full registrations. Temporary registration is no longer approved. In 2019, fungicides were the sub-category with the largest amount of new pesticide technical registered in China, followed by herbicides and insecticides.

There were XXX new registrations of pesticide technical in China obtained by XXX domestic enterprises in 2019, while XXX new registrations of pesticide technical were obtained by XXX foreign enterprises.

Jiangsu Huifeng Bio Agriculture Co., Ltd. and Liaoning Cynda Agricultural Science Co., Ltd. were the top two registrants of pesticide technical in number of new registrations in China.

In this year, the number of first registration of new active ingredients reached to XXX, accounting for about XXX% of the total active ingredients which gained technical registration in China. It's worth noting that there were XXX new active ingredients held by domestic enterprises firstly registered in China in 2019. Besides, XXX new active ingredients owned by foreign companies got the first registration for technical in China.

#### 4. What's in this report?

**Note: Key data/information in this sample page is hidden, while in the report it is not.**
